

Statement of Alignment with Industry Sustainability Standards and Best Practice Guidance

Date: 16 July 2025

1. Overview

MVR Rivermount Construction Ltd is committed to aligning with nationally recognised sustainability standards and best practices relevant to the UK construction sector. Although we are an early-stage company, we integrate sustainable practices into our policies, workforce training, and planning activities.

2. Standards and Good Practice We Align With

Our sustainability approach is informed by the following recognised standards, regulations, and best practice frameworks:

- CDM Regulations 2015 - We follow the Construction (Design and Management) Regulations to ensure safety, health, and environmental considerations throughout project planning and delivery.
- ISO 14001:2015 - We align with the principles of this environmental management standard to improve our environmental performance and compliance.
- SSIP - As a Constructionline Gold member, we are recognised under the SSIP scheme for meeting safety and environmental standards.
- CITB - Our site staff are trained through CITB-approved courses (e.g., SMSTS), which include environmental awareness and carbon reduction.
- RICS - Sustainability Guidance We support and aim to align with RICS standards relating to sustainable construction and ethical project delivery.
- CIRIA & WRAP Guidance - We follow guidance for efficient waste management, pollution control, and responsible sourcing of materials.

3. Internal Measures and Commitments

We have developed several procedures and policies to embed sustainability in our operations:

- Environmental Management Policy
- Carbon Emissions Reduction Plan
- Fuel and Waste Log Templates
- Toolbox Talks on carbon, waste, and pollution control
- Subcontractor environmental compliance assessments

4. Future Intent

We will continue reviewing and improving our approach in line with emerging sustainability standards, and plan to work towards formal ISO certification as the business grows.

Madankumar Yeligar
Director
MVR Rivermount Construction Ltd
